Small 8vo. Original purple cloth, title in gilt on front cover, edges gilt; pp. 82, [14, advertisements]; some fading to cloth as usual (esp. spine), a little shaky, inscribed by the author to front free endpaper.

First Edition. Curious little treatise on species of bird, their habits and practical advice on how best to keep them as pets. Often referring to them as "little dewdrops of celestial melody" (a nod to Thomas Carlyle), Holden oscillates between a scientific detachment and childlike glee, which results in a tidalwave of obscure and intriguing facts and tips concerning a wide variety of garden birds, songbirds and exotic birds crammed into a tiny space. Have you ever wondered what to do with an epileptic canary? Well, this is your chance to find out. Just to make it even more madcap, he intersperses the ornithological summaries with fragments of poetry scavenged from famous writers, most of which have no discernible link to birds whatsoever.

First edition. White's classic account of his struggle to train a goshawk has begun to be rediscovered after featuring heavily in Helen MacDonald's Costa Award-winning *H is for Hawk* (2014). She points out that White's book is as much a psychological drama as a book on falconry, and also identifies many ways in which his experiences with the hawk fed into his writing of *The Once and Future King*; White comes to resemble his hawk just as the young Arthur is transformed into a merlin. Although highly regarded by falconers, this book never became a bestseller, and is consequently difficult to find in nice condition.
